

SEBO Airbelt D4 Brochure

AIRBELT D4: The New Icon of Canister Vacuums and Much More!

D4 Vacuum Video Review

[Sebo Airbelt D4 Canister Vacuum](#) is equipped with many extras that will make your life easier! Its ♦ suction-optimized ♦ airflow pathway, together with its one-of-a-kind tapered-hose technology, provides ultra-quiet operation & amazing suction power. The ergonomically designed handle offers unmatched user comfort and smooth operating maneuverability. Every detail expresses the highest quality, modern design, reliability, & the standard features SEBO customers throughout the world have come to expect, such as:

- ♦ SEBO ♦s Patented AIRBELT Bumper Guard.
- ♦ A power head with amazing steering ability and easy brush roller removal.
- ♦ An adjustable telescopic tube with internal power cord.
- ♦ Long-lasting motor life, which is further extended by its soft-start switch.
- ♦ S-class, hospital-grade filtration, which is excellent for users w/ allergies or asthma.
- ♦ Available in three colors: black, red and white.
- ♦ A generous five-year warranty on both labor and all non-wear parts.

A 40-foot power cord and an amazing 50-foot cleaning radius. Provides operating comfort for the user. Cleans large areas without the need to change electrical outlets. The power cord is automatically rewound by simply pressing a button.

A huge 1.5-gallon filter bag. The large-capacity [Airbelt D4 Filter Bag](#) is convenient and economical because fewer bag changes are needed. A display indicates when the filter bag should be replaced, and closing its built-in hygiene cap prevents dust from escaping during removal or disposal.

A durable, rotating suction-hose connection. A brilliantly designed hose-to-canister connection allows 320-degree rotation of the suction hose, providing easier user movement and machine maneuverability.

Adjustable suction-power switch on the handle. The suction power of the SEBO [AIRBELT D4 Canister](#) can be conveniently adjusted on the hose handle, therefore, upholstery can be cleaned with stronger suction, yet curtains can be gently vacuumed as well.

LED suction-power indicator. This technology actually makes it possible for the user to optically monitor the vacuums suction power. When using lower power settings, the LED light rotates slowly. When using higher power settings, the light rotates more quickly. When the power setting is in standby, the light rotates left to right notifying the user of its status.

Patented AIRBELT Bumper. The soft, textile-covered foam bumper that surrounds the AIRBELT D4 absorbs bumps to the canister body, thereby protecting furniture, walls and the vacuum itself from incurring scratches and scuffs during use. The AIRBELT Bumper also diffuses exhaust air, which contributes to its ultra-quiet performance.

Four castors with rubber-coated wheels, mounted on bearings and a steel axle. The superb castor-wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

Convenient parking and storage aid. After the work is done, the suction hose, telescopic tube and the hard floor parquet brush can be firmly stored on the canisters backside.

Three full-size, on-board [SEBO Accessory Tools](#). For special cleaning tasks, a crevice tool, an upholstery nozzle and a dusting brush are integrated into the canister body, so they are on-board, easy to remove and ready for use at all times.

The SEBO Parquet Brush. The AIRBELT D4 comes with a parquet brush that was designed specifically for vacuuming hard floors. It is lightweight with soft bristles, so it glides gently over floors and provides easy cleaning maneuverability.

SEBO ET-1

SEBO ET-2

The [SEBO ET-1](#) and [ET-2 Power Heads](#). The power heads available for the AIRBELT D4 are the ET-1, with a 12-inch cleaning width, and the ET-2, with a 15-inch cleaning width. The ET-1 comes standard, in the box, with black and white-colored machines. These two models are named AIRBELT D4 Premium. Red-colored machines do not come with power heads in the box. Instead, customers must choose either the ET-1 or ET-2 Power Head. Choosing the ET-2 slightly increases the price of the machine. These red machines are named AIRBELT D4. The ET-1 and ET-2 Power Heads are designed to clean carpets, as well as hard floors. Their brush rollers can be shut off during operation, so they can also be used on delicate rugs or other floor surfaces that require gentle cleaning.

The SEBO DISCO Floor Polisher. For the daily or periodic cleaning and polishing of certain types of hard floors, the DISCO Floor Polisher is optional and can be attached to the AIRBELT D4s telescopic tube.

Technical Data: Motor Ratings 1,250 watts / 12 amps total (Canister 10.2 amps / ET-1 Power Head 1.6 amps / ET-2 Power Head 1.8 amps) > Body Weight - 15.9 lbs. (Does not include the weight of a power head) > Airflow - 120 CFM > Water Lift - 95 inches > Sound Level - 61 dB A

SEBO, THE FLOOR-CARE SPECIALIST. MADE IN GERMANY

The first SEBO vacuums were developed in 1978, for the harsh demands of commercial cleaning professionals. Today, SEBO vacuums are used in the White House, Buckingham Palace, the German Parliament, the worlds leading hotels, and in homes across America. The new AIRBELT D4 canister vacuum is the worlds best because of its technical innovations, cutting-edge design, outstanding reliability, superior performance and value!
